

1. Total Number of Patients

o Write an SQL query to find the total number of patients across all hospitals.

Answer:

```
select sum(patients_count) as total_patients  
from hospital;
```

2. Average Number of Doctors per Hospital

o Retrieve the average count of doctors available in each hospital.

Answer:

```
select "hospital_name", avg ("doctors_count") as avg_doc_count  
from hospital  
group by "hospital_name";
```

3. Top 3 Departments with the Highest Number of Patients

o Find the top 3 hospital departments that have the highest number of patients.

Answer:

```
select department, patients_count  
from hospital  
order by patients_count desc limit 3;
```

4. Hospital with the Maximum Medical Expenses

o Identify the hospital that recorded the highest medical expenses.

Answer:

```
select hospital_name, max(medical_expenses) as max_expenses  
from hospital  
group by hospital_name  
order by max_expenses desc;
```

5. Daily Average Medical Expenses

o Calculate the average medical expenses per day for each hospital.

Answer:

```
select hospital_name, avg (medical_expenses) as avg_expenses,  
admission_date+interval'1 days' as one_day  
from hospital  
group by hospital_name, admission_date;
```

6. Longest Hospital Stay

o Find the patient with the longest stay by calculating the difference between Discharge Date and Admission Date.

Answer:

```
select age(discharge_date,admission_date) as stay_date  
from hospital  
order by stay_date desc;
```

7. Total Patients Treated Per City

o Count the total number of patients treated in each city.

Answer:

```
select distinct location, sum(patients_count) as total_patients  
from hospital  
group by location;
```

8. Average Length of Stay Per Department

o Calculate the average number of days patients spend in each department.

Answer:

```
select department, avg(discharge_date-admission_date) as avg_date  
from hospital  
group by department;
```

9. Identify the Department with the Lowest Number of Patients

o Find the department with the least number of patients.

Answer:

```
select department, sum(patients_count) as total_patients
from hospital
group by department
order by total_patients asc limit 1;
```

10. Monthly Medical Expenses Report

• Group the data by month and calculate the total medical expenses for each month.

Answer:

```
select to_char (admission_date,'yyyy-mm')as month,
sum (medical_expenses) as total_medical_expenses
from hospital
group by to_char(admission_date,'yyyy-mm')
order by month;
```
